**IN THIS POLICY, THE INVESTMENT RISK IN INVESTMENT PORTFOLIO IS BORNE BY THE POLICYHOLDER.**

The Unit Linked Insurance Products do not offer any liquidity during the first five years of the contract. The policyholder will not be able to surrender or withdraw the monies invested in Unit Linked Insurance Products completely or partially till the end of the fifth year.

One of the biggest challenges of retirement planning is to ensure that you have gathered enough money during your working years that will take care of your expenses once you retire. Given the rising cost of living, increased life expectancy and inflation, investments towards your retirement fund is a must to have in your financial calculations. What is equally important is to ensure that there is adequate investment made towards retirement kitty. But how can one ensure that the contribution made towards post retirement fund is "adequate"?

**The exact amount behind "adequate" money you will need when you retire, lies in the answer to two simple questions!**

The first question is **HOW MUCH MONEY** will you need when you retire?

**As a thumb rule ensure that your retirement fund is at least 20 times your expenses as in last year before retirement**

The next question is **WHAT PART OF INCOME** should be invested towards retirement planning?

Broad level calculations would indicate that, depending on your age, existing investments and new investments, you might need to save an amount ranging from 10% to 25%<sup>1</sup> of your income towards securing a comfortable retirement

## HOW WILL HDFC LIFE CLICK 2 RETIRE HELP YOU?

Let us look at a few examples before we explain the product features to you.

**Example 1:** Mr Verma, aged 35 years works in an MNC and has just completed his retirement planning. To his surprise, he has realized that out of a total of Rs. 30 Lakhs that he would need, his current investments and superannuation funds would earn him a total of approximately Rs 10,50,000 i.e. only 35% of total money required. He needs to quickly start provisioning for additional 65% amount that he would need once he retires. Let's see how HDFC Life Click 2 Retire will help him achieve his retirement goal.

Requirement of Mr. Verma: Ensure that his Pension Plan gives him an additional Rs. 20 Lakhs, when he retires. Suppose Mr. Verma purchases HDFC Life Click 2 Retire with 10 year premium paying term and 20 year policy term for Rs 1 Lakh premium

Below the chart depicts working of the plan over the entire policy term.

Below table depicts working of the plan over the entire policy term. The purchase price is exclusive of taxes and levies. The annuity amount is illustrated as per mandate by IRDAI at assumed rate of return of 8% and 4%. The annuity amount will depend on the then prevailing annuity rates and options at the time of purchase of the then available Annuity Plan. It is assumed that the entire purchase price has been used to purchase annuity from us.

### **A. Risk Factors:**

- Unit Linked Insurance products are different from the traditional insurance products and are subject to the risk factors.
- The premium paid in Unit Linked Insurance policies are subject to investment risks associated with capital markets and the NAVs of the units may go up or down based on the performance of fund and factors influencing the capital market and the insured is responsible for his/her decisions.
- HDFC Life Insurance Company Limited is only the name of the Life Insurance Company and HDFC Life Click 2 Retire is only the name of the unit linked insurance contract and does not in any way indicate the quality of the contract, its future prospects or returns.
- Please know the associated risks and the applicable charges, from your Insurance agent or the Intermediary or policy document issued by the insurance company.
- The various funds offered under this contact are the names of the funds and do not in any way indicate the quality of these plans, their future prospects and returns.

## B. Unit Prices:

We will set the Unit Price of a fund as per the IRDAI's guidelines. The unit price of Unit Linked Funds shall be computed as: Market Value of Investments held by the fund plus the value of any current assets less the value of current liabilities and provisions, if any. Dividing by the number of units existing at the valuation date before any units are allocated/redeemed, gives the unit price of the fund under consideration. We round the resulting price to the nearest Re. 0.0001. This price will be daily published on our website and the Life Insurance Council Website. Units shall only be allocated on the day the proposal is accepted and results into a policy by adjustment of application money towards premium. The premium will be adjusted on the due date even if it has been received in advance and the status of the premium received in advance shall be communicated to the policyholder.
