- ◆ Death sum assured: ₹3,00,000
- ◆ Mode of premium payment: Monthly
- ◆ Premium payment term: 10 years

Please Note: These illustrations are for a healthy male. The above are illustrative maturity values net of all charges, goods and services tax and cess as applicable. The illustration is presented with 2 different assumed rates of future returns. The returns shown in the benefit illustration are not guaranteed and they are not the upper or lower limits of what you might get back, as the value of your policy depends on a number of factors including future investment performance.

The premiums paid by you are allocated to an investment account created under your policy. This premium minus applicable charges, is used to buy units in your chosen funds, in the proportions specified by you.

Plus your investment account is also credited with guaranteed loyalty additions at the end of the 10th policy year and every 5 years thereafter till the end of policy term subject to the policy being in force..

The fund value of your investment account reflects the wealth built over time basis your premium contribution, guaranteed loyalty additions and returns accrued from the investment options chosen.

Your investment account is also used to pay charges associated with your policy. For this sufficient units are cancelled to meet the amount of the payments due. If units are held in more than one unit linked fund, then proportionate units in each fund are cancelled to meet the amount of the payment. For partial withdrawals, units are cancelled from the unit linked funds specified by the policyholder.

The fund value on any given date will be equal to the number of units in that fund X NAV of the fund as on that date.

Systematic Allocator facility: This tool is specially designed to cater to the key needs of balancing growth and safety on investments. As your Wealth Gain nears maturity, it becomes essential to ensure the wealth accumulated over the years is not risked by some sudden drop due to the unfortunate market fluctuations.

Systematic Allocator is a programmed investment solution in which the fund mix becomes more conservative (i.e. more debt-oriented with an attempt to reduce the risk of loss) as the investment goal comes closer to fulfillment.

As per this strategy, your funds will be proportionately invested in Equity Growth Fund (a high risk fund) and Income Fund (a low risk fund) based on the balance time to maturity of your plan (end of your policy term). As your plan approaches maturity, funds will be proportionately allocated to the Income Fund from the Equity Growth Fund. By reducing the investment in Equity Growth Fund, the risk of a sudden drop in the equity market affecting your accumulated fund value reduces.

Balance time to maturity (in years, rounded up to the nearest integer) of your plan is used to determine the proportion of allocation to the Equity Growth Fund and the Income Fund. This proportion is pre-defined by the Systemic Allocator "Glide Path". It is the proportion allocated to the Equity Growth Fund and Income Fund based on the time remaining for the plan to attain maturity as shown in the table below, the premiums will be allocated and the Fund Value will be rebalanced at each policy anniversary as per Glide Path:

Systematic Allocator Glide Path

Balance time for the plan to attain maturity (in years)	Proportion allocated to the Equity Growth Fund	Proportion allocated to the Income Fund
1	5.00%	95.00%
2	10.00%	90.00%
3	15.00%	85.00%
4	20.00%	80.00%
5	25.00%	75.00%
6	30.00%	70.00%
7	35.00%	65.00%
8	45.00%	55.00%
9	50.00%	50.00%
10	55.00%	45.00%
11	60.00%	40.00%
12	65.00%	35.00%
13	70.00%	30.00%
14	75.00%	25.00%
15 and above	80.00%	20.00%

You may choose the Systematic Allocator facility at the time of policy purchase. Alternately, you may also switch to this option on any policy anniversary. Once you have chosen the Systematic Allocator, you will not be allowed to manually switch or redirect your premiums between the investment funds. However, you may switch back to the 'Do-it-yourself' strategy at anytime during the plan term.

There are no additional charges for the Systematic Allocator facility. However, the underlying fund management charges applicable to the Equity Growth Fund and Income Funds will apply.

Minimum allocation to a fund:

The minimum amount of premium allocated to any investment fund should be at least 15% of the annual premium.

Unit price (Net Asset Value) formula:

The Net Asset Value (NAV) is determined using the market value of assets in accordance with regulatory requirements.

Net Asset Value (NAV) =

(Market value of investments held by the fund + value of current assets – value of current liabilities and provisions if any)

Number of units existing on valuation date before creation/redemption of units

Fund Management Charge is levied as a percentage of the value of assets and will be appropriated by adjusting the NAV on a daily basis. The NAV calculated as per the above formula shall be declared on our website daily in accordance with IRDAI regulations. (except on days when it is not possible to value some or all of the assets of a unit linked fund due to Force Majeure conditions)

Applicable NAV:

New business premiums will be allocated units at the NAV applicable on the date of commencement of the policy after completion of the proposal.

At any time during the policy term, you may instruct us in writing to switch some or all of your units from one unit-linked fund to the other unit-linked fund(s). Such switching between funds can be done any number of times free of charge. Further to which, we shall cancel the units in the old fund and allocate units to the new fund(s) in order to activate the switch. Switching is not allowed if Systematic Allocator is opted. Switches advised up to 3:00 pm will be processed at that day's NAV, while switches advised after 3:00 pm will be processed at the following day's NAV. There is no restriction on number of switches allowed in a policy year.

Renewal premiums paid through outstation cheques or outstation demand drafts will be allocated units as per the NAV on the business day of realisation of the cheques or demand drafts. In case you pay your renewal premiums in advance, the units will be allocated as per the NAV prevailing on the due date of the premium due.

In case of cancellation of units for charges and valid notification and instructions received at the company's designated offices for switches, partial withdrawals, surrenders and death claims, the same day's NAV is applicable if the request is received before the cut-off time. Else, the request will be processed at the next business day's NAV. The cut-off time is as per the IRDAI guidelines, which, at present is 3.00 pm.

Account Statement:

We will send you the account statement every year at the policy anniversary.

New funds:

Ageas Federal will introduce new funds, from time to time, to meet changing needs of investors, market conditions and regulatory environment. Such new funds shall also be made available to our existing customers. We may also modify the existing funds subject to IRDAI approval. Similarly, old funds may be withdrawn or merged.
