- (a) Reduction in output and
- (b) Increase in Cost of Working and the amount payable as indemnity thereunder shall be

1. In respect of Reduction in output: the sum produced by applying the rate of gross profit to the amount by which the output during the indemnity period shall in consequence of the damage fall short of the standard output.
2. In respect of Increase in Cost of Working; the additional expenditure (subject to provision of memos) necessarily and reasonably incurred for the sole purpose of avoiding or diminishing the reduction in output which but for that expenditure would have taken place during the indemnity period in consequence of the damage, but not exceeding the sum produced by applying the rate of gross profit to the amount of the reduction thereby avoided.

Policy Wording - MLOP 8

Less any sum saved during the indemnity period in respect of such of the Insured Standing Charges as may cease or be reduced in consequence of the damage.

Provided that if the sum insured by this item be less than the sum produced by applying the rate of gross profit to the annual output, the amount payable shall be proportionately reduced.

DEFINITIONS -

1. GROSS PROFIT –

The sum produced by adding to the Net Profit the amount of the Insured standing charges or if there be no Net Profit, the amount of the Insured Standing Charges less such a proportion of any net trading loss as the amount of the Insured Standing Charges bears to all the Standing Charges of the business.

2. NET PROFIT -

The Net Trading Profit (exclusive of all capital receipts and accretions and all outlay properly chargeable to capital) resulting from the business of the Insured at the Premises after due provision has been made for all Standing and Other Charges including depreciation but before the deduction of any taxation chargeable on profits.

3. OUTPUT -

The quantity of ___ produced at the premises, measured in units of ___

4. INDEMNITY PERIOD AND TIME EXCESS -

The Period not exceeding the indemnity period limit stated in the list of machinery and plant insured commencing with the occurrence of the accident during which the results of the business are affected in consequence of such accident provided always that the Company is not liable for the amount equivalent to the rate of gross profit applied to the standard output during the period of time excess (in terms of ___ days) stated in the policy.

5. RATE OF GROSS OUTPUT –

(a) Rate of Gross Profit: Rate of Gross Profit per unit earned on the output during the financial year immediately before the date of damage. The results which but for the damage would have been obtained during the relative period after the accident.
(b) Standard Output: Output during that period in 12 months immediately before the date of damage which correspond to indemnity period.	
(c) Annual Output: The output during 12 months immediately before the date of damage.

2. MEMO 2 - RELATIVE IMPORTANCE –

The term relative importance referred to in the list of machinery and plant insured shall be the percentage effect which a breakdown of a particular machine will have on the total gross profit, disregarding any loss minimizing measures.

If in the event of an accident affecting an insured item of machinery, the percentage of relative importance stated in the list of machinery and plant insured for this item is lower than the actual percentage of relative importance subsequently arrived at for the period of interruption, the Company shall only be liable to indemnify the proportion which the

In calculating the loss, due allowance shall be made for the time spent on any overhauls, inspections or modifications carried out during any period of interruption.

5. MEMO 5 – REINSTATEMENT OF SUM INSURED –
